Career Objective

Passionate about creating responsive, user-friendly interfaces and scalable web applications. Developed platforms like Audit Tracker (Enterprise audit management system), Nest-Grocery (E-commerce website), and GitHub Repo Remover (GitHub Manager). Experienced in React, Next.js, and MERN stack development. Eager to contribute to dynamic teams, implement efficient solutions, and continuously improve code quality in an Agile environment.

Skills

Core: HTML, CSS, JavaScript, React.js, Tailwind CSS, Redux Toolkit, Next.js, RESTful APIs, Git & GitHub

Comfortable / Familiar: Node.js, Express.js, MongoDB, JWT, Stripe, OAuth, Firebase, TypeScript,

Projects

Audit Tracker (Enterprise Audit System)

A comprehensive platform for managing audits, workflows, and reporting for multiple organizations.

- **Implemented** role-based access control and dynamic audit templates for multiple user roles
- **Built** real-time problem tracking and approval workflows, enabling faster issue resolution
- Advanced filtering and search across companies, sites, and audits
- Comprehensive dashboard with analytics and reporting

Tech: React, Next.js, Tailwind CSS, Express.js, Node.js, MongoDB, JWT, RESTful APIs, Axios, Middleware Authentication
